Insulin Passport

Instructions

You should complete as much information for your passport as possible, then fold it as instructed.

Keep it with you for emergencies and for reference when insulin products are prescribed or dispensed.

The area below is <u>not</u> for use as daily diary record.

In the table below you should record information of your current insulin products. Provide as much detail so that your insulin is clearly identified. A healthcare professional can help you with this. If someone else has added information, ask them to sign it. You must keep this information up to date. Keep the passport with you and when you need to contact a healthcare professional, show it to them. They can use the information to help identify exactly what insulin products you use.

Date Started	Date Stopped	Insulin Brand name	Presentation (for example, vial, cartridge, or prefilled pen)	Signature
